TABLE OF CONTENTS

BALLYMORE
Safety Products

Manual Material Handling

Safety products include conveyor tables, paint carts & more. Essential items to enhance worker & customer safety in warehouse and retail settings.

PG.8

BALLYMORE
Safety Products

Ballypal Stackers

Stackers minimize strain & maximize efficiency in pallet handling operations. These fully powered units feature adjustable components, enhancing versatility & productivity in various environments.

PG.9-11

BALLYMORE
Safety Products

Portable Loading Docks

Portable loading docks enable easy loading at dock or truck bed heights. Rough terrain options available. Reduces strain & improves safety across work environments.

PG.14

BALLYMORE
Safety Products

Ball Transfer Table

Portable ball transfer tables allow easy sliding of merchandise, reducing lifting strain and minimizing injury risk. Powered lifting & lowering with pushable and powered-drive options.

PG.15

Have You Wondered the Difference the Right Tool Makes?

ERGONOMIC EVALUATOR

Ballymore Safety Products is proud to provide ergonomic evaluation services through our website!

Scan the QR code for a free safety evaluation.

Ballymore Palletjacks

Powered pallet jacks offer advanced lithium-powered solutions with professional-grade performance. Engineered for durability with a range of capacities & sizes.

PG.12

Trailer Tugger

Trailer tuggers tow & stabilize trailers with combined weights up to 10,000 lbs. This robust machine enhances efficiency & safety in heavy-duty material handling operations.

PG.13

Mobile Platform Lift

The mobile platform lift provides 800lb capacity in a highly portable design. Accommodating various item/package shapes, they reduce lifting strain across a variety workplace settings.

PG.15

Level Loader Table

Level loaders offer an economical solution for palletizing/depalletizing & work positioning, enhancing efficiency and ergonomics with spring or airbag options.

PG.17

TABLE OF CONTENTS

LIFT PRODUCTS INC.
INNOVATIONS IN ERGONOMICS

Lift Tables

Lift tables improve ergonomics of work positioning, available in light to heavy-duty models. Styles include double-high, double-wide, double-long, & more.

PG.18-28

LIFT PRODUCTS INC.
INNOVATIONS IN ERGONOMICS

Level Lifter

Level Lifters offer ground-entry lift solutions without pit installation. Featuring thin side walls & a 4-point lift system, they handle unstable loads efficiently. Adjustable for comfort, with easy access for loading.

Stacking sections provide a compact storage footprint

CONVEYOR TABLE

- **100 lbs Per Linear Foot**
- Approximately 63' when fully extended
- Omni-directional wheels allow travel in any direction
- Includes extra handle - The conveyor can be split into two sections for dual use
- Weight - 1,225 lbs
- Height ranges from from approx 26" to 42" fully extended
- Stacking sections provide compact storage footprint

FOLDS FOR EASY TRANSPORT & STORAGE

PAINT CART

- **Capacity = 400 lbs.**
- Base = 20" Wide X 27" Long
- Shelf - 20" Wide X 20" Long
- Overall Height 42"
- Four Heavy Duty Casters (2 swivel, 2 rigid)
- Weight = 62 lbs.
- Ships Assembled
- Colors Available In Orange or Blue

NOT JUST FOR PAINT CONTAINERS

Perfectly designed patent pending Heavy Duty Paint Cart. The paint cart makes transporting a 5 gallon container quicker and less stressful on the back and shoulders.

MODEL # BPCRT-O

MODEL # BPCRT-B

MERCHANDISE LADDER CART

- **Capacity = 1000 lbs.**
- Base Dimensions= 21"x 51"
- Overall Height= 63"
- Steps= 3 with Abrasive Mat
- Top Shelf Height= 28"
- Top Shelf Dimensions= 20" Wide by 40" Long
- Bottom Shelf Dimensions= 20" Wide by 45" Long
- Casters= 4 - 2 swivels and 2 rigid
- Weight = 108 lbs.

MODEL # BMLC

Ballymore introduces the heavy duty merchandise ladder cart with a capacity of 1,000 lbs. The cart has two large shelves for transporting a variety of merchandise. Ladder portion has a spring loaded device which secures the ladder to the floor when climbing and retracts for easy maneuvering. Cart is equipped with 4 casters- 2 swivels and 2 rigid for effortless turning and moving. Durable powder coated gray with yellow steps.

BALLYPAL 22AG63 & 22AG138 STACKER

- Capacity = 2200 lbs.
- Forks adjust from side to side to accommodate skid widths
- Adjustable forks lower to the minimum height 2 1/8"
- Distance between fork 8 1/4" to 28 1/2" (Adjustable)
- Straddle legs adjust to three positions
- Sturdy mast made of rolled U-shapes
- Powerful lift motor 2.1 HP
- Battery gauge and On/Off switch
- Integrated 150 Ah maintenance free battery provides more than enough power to handle heavy duty lifting
- Integrated charger facilitates easy and reliable charging

BALLYPAL 22NSL114 & 22NSL142 ADJUSTABLE LITHIUM STACKER

- Capacity = 2600 lbs.
- Battery = 24V / 60AH Lithium
- Duty Cycle per Charge = 4 Hours
- Straddle Legs O.D. = 46" to 58"
- Straddle Legs I.D. = 38" to 50"
- Load Center= 24"
- Travel Speed= 2.61/Laden- 2.80 Unladen
- Overall Width= 47"
- Charger= 25AMP on board

BALLYPAL22AG63

Adjustable straddle leg design, suitable for diverse pallet sizes and more stability

Fully Electric Lithium Stacker with Adjustable Base Legs

BALLYPAL 22MSL63 ADJUSTABLE MONO MAST STACKER

- Capacity = 2200 lbs.
- Overall Fork Width 10" to 32" (Adjustable)
- Travel Speed = 2.3/2.5 mph
- Max Gradeability= 5% Laden and 10% Unladen

BALLYPAL 22LSL138 ADJUSTABLE DUPLEX MAST STACKER

- Capacity = 2200 lbs.
- Overall Fork Width 10" to 32" (Adjustable)
- Travel Speed = 2.3/2.5 mph
- Max Gradeability= 5% Laden and 10% Unladen

BALLYPAL 35TSL157 ADJUSTABLE STACKERS

- Capacity = 3500 lbs.
- Overall Fork Width 10" to 29" (Adjustable)
- Travel Speed = 3.5/ 3.7 mph
- Max Gradeability= 6% Laden and 12% Unladen

Fully Electric Mono Mast & Dual Mast Entry Level Stackers

- Mono mast for maximum visibility
- Built- in charger
- Battery discharge indicator with lift lock out for improved battery life
- 3 points design with centered drive for maximum stability and traction
- Two Powerful 12Volt batteries
- Straddle leg width range 46" x 58"

Fully Electric Mono Mast & Dual Mast Entry Level Stackers

- Duplex mast
- Built- in charger
- Battery discharge indicator with lift lock out for improved battery life
- Adjustable straddle leg design for diverse pallet designs and improved stability
- 3 points design with centered drive for maximum stability and traction
- Two powerful 12Volt 85Ah batteries
- Straddle leg width range 46" x 58"

Fully Electric Straddle Leg Walkie Electric Stacker

- Proportional lifting allows for efficient and safe lifting of any product at any lift speed.
- State of the art components
- Mesh protection for safety as well as great visibility during operation
- Robust chassis and thick apron protect the truck and its components
- Three stage mast

10,000 Lb. Capacity!

NEW

TRAILER TUGGER

- **Capacity = 10,000 lbs.**
- Designed to tow and stabilize trailers with a combined weight of up to 10,000 lbs.
- 2,000 lb. counterweight secures trailers during loading/unloading (e.g., skid steer, mini excavator).
- Powered by 48V 20Ah removable Lithium-Ion battery.
- Battery is swappable rechargeable (on/off unit), and fully charges in ~2 hours.
- Charges via standard 120V outlet
- Fits through 42" doors for indoor storage

BALLYPAL-STK48BC

- This tool turns a lifting or lowering task into a lower risk push or pull.
- The tool allows an employee to slide product on or off a shelf anywhere from 12" high to 48" without lifting.
- Product can be rolled onto the table and rotated to the desired direction with ease.
- Smooth rolling casters. Pushing force on level concrete, when fully loaded =
- Can be used to assist in palletizing / depalletizing heavy product
- Key Controlled
- The balls retract automatically when the table is lowered to provide a secure surface or transport.
- Balls can be raised and lowered independently of the table height control if needed.

BALLYPAL-STK72BC-DRV

BALL TRANSFER TABLE

Pushable:

- **500 lbs Load Capacity**
- Table dimensions - 20" x 35" (leaves room in the aisle for customer to pass by)
- Table contains multi directional ball rollers
- The table height - from 12" to 48"
- Footprint - 21" x 53"
- Weight - 500 lbs
- Overall Height - 51" Lowered

Drivable:

- **500 lbs Load Capacity**
- Table dimensions - 20" x 35"
- Table Dimensions: 31 1/2" W x 36" D
- Overall Height: 89"
- Footprint: 60" Overall Length x 34" Overall Width
- Litium Battery: 24V
- Raised Table Max Height: 72"
- Table Lowered Height: 6 1/2"
- Weight 1,364 Lbs

Removable Deck

NEW

MOBILE PLATFORM LIFT

- **800 lbs Load Capacity**
- Manual service brake
- Key-controlled
- Maintenance free sealed liquid-acid battery
- Narrow footprint leaves room in aisle to pass by
- Platform table allows for handling of non-palletized materials
- Improves safety & ergonomics by turning a lifting task into a push-pull task

MODEL #	CAPACITY	PLATFORM L X W	WEIGHT	HEIGHT RAISED	HEIGHT LOWERED	BATTERY	OVERALL HEIGHT	OVERALL LENGTH	OVERALL WIDTH
MINI STACKER EMS 850	800	25.75" x 22.75"	243	65"	3.35"	12V/60Ah	68"	41"	24"

HOW TO CHOOSE A LIFT TABLE

1. Identify the characteristics of the materials being handled

Load Weight: Determine the total weight of the load. Lift tables typically support loads ranging from 1,000 to 6,000 lbs in 500 lb increments.

Load Dimensions: Choose a table top size that supports most of the load without being too small (to avoid stability issues) or too large (to prevent excessive overhang that forces workers to reach).

Loading Method:

- For forklift or conveyor loading, a standard lift table suffices.
- For pallet trucks or floor-level loading, consider a ground entry or pit-mounted table. Note that these designs are more costly due to compliance with OSHA standards.

Individual Item Size and Weight:

- Smaller items require lift tables with proper height adjustments for ergonomic positioning.
- Typical lift table height ranges include lowered heights of 6-8 inches and raised heights up to 54 inches.
- Heavier individual items should be positioned at waist level and within easy reach to minimize strain.

2. Assess Workplace Injury Risk

Frequency of Lifting: High-frequency tasks increase the risk of repetitive motion injuries (RMI). Electro-hydraulic lift tables provide precise placement and are better suited for such applications compared to pneumatic or weight-sensitive models.

Reaching Distance: Excessive reaching can lead to injuries. Consider lift tables with load rotation or tilting capabilities to minimize reach distances.

Carrying Distance: Shorter carrying distances reduce injury risks. Mobile lift tables with casters, fork pockets, or dollies can help minimize transition distances.

3. Evaluate Work Environment Conditions

Environmental Factors: Identify any special requirements such as stainless steel construction, specific bearings, or custom power supplies for compliance with industry standards.

Space Constraints: Ensure the lift table fits within the available workspace without creating additional hazards. Some designs may require more floor space than others.

Operator Controls: Choose control options (e.g., pedestal-mounted controls, foot controls, magnetic-backed control boxes) that optimize ergonomics and reduce tripping hazards.

Power Supply:

- Lift tables can operate on single-phase (115V or 230V) or three-phase (230V or 460V) power.
- Higher-capacity tables often require dedicated circuits for single-phase models, while three-phase units are more efficient for high-use applications.

4. Select a lift table that will perform

Customization Options: Standardized models may not meet all ergonomic requirements. If your application has unique needs, work with manufacturers who offer tailored solutions.

Construction Quality: For industrial-grade use, prioritize features like fabricated scissor arms (not tubular steel), all-welded construction, and adherence to ANSI MH29.1 standards.

Component Quality:

- High-quality cam rollers, pivot pins, and bearings are critical for durability.
- Opt for motors with long duty cycles from reputable manufacturers like WEG.

Service Life Enhancements:

- Look for maintenance-friendly designs with grease fittings on pivot points and cam rollers.
- Ensure motors and controls are easily accessible.
- Avoid modular power units that cannot be serviced directly.
- By following these guidelines, you can select a lift table that not only meets your operational needs but also enhances workplace safety and efficiency while minimizing long-term costs.

Large Cylinders

5" bore cylinders provide high efficiency due to larger piston surface, sealed with teflon for extra long life.

15 Min. Motor

Intermittent duty. Able to be run for 15 minutes of every hour. Suitable for medium and high cycle applications.

Trapped Rollers

Captured 'Lift-Lok' secures top and base leg rollers and allows for easy maintenance access when lowered.

HD Scissor Arms

Heavy duty 1.5" x 8" solid scissor arms provide exceptional strength and load stability for safe handling.

LEVEL LOADER

Each Selection Can Be Purchased With Hand Or Foot Controls
*** Stainless Steel/Steel-It Paint for "Wash Down Applications"**

OPTIONS:

Teflon Seals	15 Min. Motor	Trapped Rollers	HD Scissor Arms
Extends cylinder life by reducing friction and wear. Faster stroke speeds than rubber. High chemical resistance.	Intermittent duty. Able to be run for 15 minutes of every hour. Suitable for medium and high cycle applications.	Captured 'Lift-Lok' secures top and base leg rollers and allows for easy maintenance access when lowered.	On camroller and pivot points. Regreaseable. Lasts longer than lifetime lubricated bearings. Easily serviced.

Rotating Top

Tapered Edges

- Internally mounted 1.5 HP 115/230V-I-60 or 230/460-3-60 intermittent duty TENV super torque motor
- 115V operating control voltage
- NEMA constant pressure Magnet backed up-down push button control station with 10' straight or coiled cord
- Cylinders with internal stops
- 10' power cord (connector not included)
- Integral safety restraint maintenance bars
- S.A.E. hoses and fittings
- NEMA - 1 prewired controls and electrical connectors. Control box contains contactor, control transformer, thermal overload and fuse
- Hard, chrome plated, polished shafting hydraulic cylinder piston rods
- Surfaces degreased, descaled and finished with Safety Yellow and Blue enamel
- Smooth steel top with yellow and black safety strips
- Internal gear pump with check valve, relief valve, solenoid valve
- Includes hydraulic oil and filter

ADDITIONAL OPTIONS:

- Foot Control Switch
- Up-Down Push Button with Key Lock-Out
- Adjustable Limit Switch
- Adjustable Lower Limit Switch
- 24 Volt D.C. Power Unit
- Remote Power Unit Pump, Motor & Tank
- Adjustable Flow Valve for Lowering
- Low Temperature Hydraulic Oil
- Low Profile Outboard Mounting of Casters
- All Swivel Lock Casters
- Floor Lock
- Push Handle for Caster Tables
- Fork Pockets
- Hydraulic Fuse
- Portability (2) Fixed Wheels and Dolly Jack
- Portability (2) Fixed (2) Swivel Casters
- Outboard Mounting of Casters
- Handrail Gate
- Pit Frame
- Rotating Top
- Spring Activated Detents
- Round Top
- Electric Interlock

- Internally mounted 1.5 HP 115/230V-I-60 or 230/460-3-60 intermittent duty TENV super torque motor
- 115V operating control voltage
- NEMA constant pressure magnet backed up-down push button control station with 10' straight or coiled cord
- Cylinders with internal stops
- 10' power cord (connector not included)
- Integral safety restraint maintenance bars
- S.A.E. hoses and fittings
- NEMA - 1 prewired controls and electrical connectors. Control box contains contactor, control transformer, thermal overload and fuse
- Hard, chrome plated, polished shafting hydraulic cylinder piston rods
- Surfaces degreased, descaled and finished with Safety Yellow and Blue enamel
- Smooth steel top with yellow and black safety strips
- Internal gear pump with check valve, relief valve, solenoid valve
- Includes hydraulic oil and filter

ADDITIONAL OPTIONS:

- Foot Control Switch
- Up-Down Push Button with Key Lock-Out
- Adjustable Limit Switch
- Adjustable Lower Limit Switch
- Remote Power Unit Pump, Motor & Tank
- Adjustable Flow Valve for Lowering
- Low Temperature Hydraulic Oil
- Diamond Tread Deck
- Tilting Top
- Low Profile Outboard Mounting of Casters
- All Swivel Lock Casters
- Floor Lock
- Push Handle for Caster Tables
- Fork Pockets
- Portability (2) Fixed Wheels and Dolly Jack
- Portability (2) Fixed (2) Swivel Casters
- Rotating Top
- 24 Volt D.C. Power Unit
- Outboard Mounting of Casters
- Handrail Gate
- Pit Frame
- Hydraulic Fuse
- Electric Interlock

G SERIES SCISSOR LIFT TABLE

- Upper Platform Full Perimeter Safety prevents descent upon obstruction
- Electric circuit reset button in case safety perimeter bar is activated
- Upper limit switch shuts motor off at full height extension reducing wear
- Single acting lift cylinder with flow control to prevent fast lowering
- Low Tension (24v) control box with up and down buttons
- Lifetime lubricated bearings on lift arms
- 1.7HP 115V motor with low amp draw and reliable performance
- Runs on a standard 15 amp circuit

ADDITIONAL OPTIONS:

- Foot Controls

MAX-LIFT HEAVY DUTY SCISSOR LIFT TABLE

- 1.5" x 8" solid scissor arm
- Internal 3 HP intermittent duty TENV super torque motor
- 115V operating control voltage
- NEMA constant pressure magnet backed up-down push button control station
- NEMA-1 prewired controls and electrical connectors
- Control box contains contactor, control transformer, thermal overload, and fuse
- Cylinders with internal stops
- 10' power cord (connector not included)
- Hard, chrome-plated, polished shafting hydraulic cylinder piston rods
- Surfaces degreased, descaled, and finished with Safety Yellow and Blue enamel
- Smooth steel top with yellow and black safety stripes
- S.A.E. hoses and fittings
- Integral safety restraint maintenance bars
- Internal gear pump with check valve, relief valve, and solenoid valve
- Includes hydraulic oil and filter

ADDITIONAL OPTIONS:

- Foot Control Switch
- Key Lock-Out
- Adjustable Limit Switch
- Adjustable Lower Limit Switch
- Remote Power Unit
- Adjustable Flow Valve
- Low Temperature Hydraulic Oil
- Fork Pockets
- Hydraulic Fuse
- Handrail Gate
- Pit Frame
- Rotating or Round Top

GUARDIAN LOW PROFILE SCISSOR LIFT TABLE

- Meets and exceeds both U.S. (ANSI) and EU safety standards
- Upper platform fitted with safety perimeter which prevents descent on contact
- Low-tension (24V) control box with up-down buttons
- Electric circuit reset button in case the safety perimeter is actuated
- External power pack equipped with a relief valve against overloading
- Compensated flow valve for controlling lowering speed
- External power pack is supplied with 8' long hoses
- Upper limit switch
- 115 voltage single phase standard
- 230/460 voltage three phase available
- Single acting cylinders with drainage system
- Check valve to stop the lift table lowering in case of hose burst
- Safety clearance between scissors to prevent trapping during operations
- Mechanical blocks for safe maintenance operations
- Self-lubricating bushings on pivot points
- Removable lifting eye(s) to facilitate installation of the lift table

4-Point Lift

Exclusive lift system provides minimum load deflection for handling unstable loads where a level platform is critical.

Photo Eye

Photo eye to interrupt lowering in the event of obstruction. Simply clear the obstruction to continue lift operations.

Beveled Lip

Lip is beveled into platform a full 3" to allow for smooth entry even with a hand pallet truck.

Portable

Align platform and insert chained pin through to convert platform into a support for pallet jack.

MML-50

MMLE LIFT CARTS

- Ergonomic push handle
- Push button controls
- (2) front rigid poly casters
- (2) rear swivel poly casters
- Brakes on swivel casters
- Onboard 12V battery
- Trapped top/bottom rollers
- Maintenance safety bars
- Maintenance isolator switch
- Internal automatic charger
- Battery discharge indicator
- Emergency relief valve
- CE certified
- Quality fit and finish

ADDITIONAL OPTIONS:

- Die Handling Top
- All Swivel Casters
- Safety Skirting
- Side Mounted Handle

MMLA LINER ACTUATED LIFT CARTS

- No oil leaks
- No hydraulic drift
- Quiet operation
- Precise actuation
- Brakes on rear casters
- Onboard 12V battery
- Trapped top/bottom rollers
- Maintenance safety bars
- On/Off Switch
- Internal automatic charger
- Battery discharge indicator
- Green/Red charging lights
- All swivel medical casters
- Hand controls on 5' cord
- Quality fit and finish

ADDITIONAL OPTIONS:

- Die Handling Top
- All Swivel Casters
- Safety Skirting
- Side Mounted Handle

Mounted Controls

Simple push buttons controls are mounted directed on the handle. Visual and color coded.

Onboard BDI

Built-in battery charge indicator clearly shows remaining life of the 12V onboard battery.

Safety Bars

Retractable built-in maintenance safety bars provide a hard mechanical stop during inspection.

Internal Charger

Fully automatic internal charger runs on 110V. Power cord Velcro mounted under platform.

MODEL #	VERTICAL TRAVEL	CAPACITY	HEIGHT		PLATFORM SIZE	SHIP WEIGHT
			MIN	MAX

BM-MMLE-80D	37	1,760 lbs	20	57	20.5 x 39.8	458 lbs

Linear Actuator

Quiet and precise lifting of the platform with no hydraulic drift or potential oil spills.

Onboard BDI

Built-in battery charge indicator clearly shows remaining life of the 12V onboard battery.

Trapped Rollers

Top and bottom rollers are trapped within a steel C channel providing excellent stability.

Hand Controls

On a 5' long coiled cord allows the operator to raise and lower the lift from any position.

LOWERED HEIGHT (IN INCHES)

12

12

12

Lowered height not included in part number

Zerk Fittings

On camroller and pivot points. Regreasable. Lasts longer than lifetime lubricated bearings. Easily serviced.

AC Traction Controls

Smoother speed transitions allow the lift to move an inch at a time to avoid damage in tight spaces.

Trapped Rollers

Captured 'Lift-Lok' secures top and base leg rollers and allows for easy maintenance access when lowered.

Ergonomic Handle

Ergonomically contoured handle features easy-to-reach controls that are intuitive to learn and operate.

Pallet Truck Features:

- Static torque control
- AC traction control
- Electric brake release
- Anti-roll braking
- Lugged drive tires
- Programmable parameters
- Battery Discharge Indicator
- Snap fit poly carbonate covers
- Composite bushings
- Detachable power cord
- Rubber bumper skirt
- Ergonomic control handle
- Precise speed control
- Secure battery restraints
- Easy Battery pack access

ADDITIONAL OPTIONS:

- Custom platform sizes
- Custom platform shapes
- Conveyor top
- Radio controlled lift
- Ball transfer top
- Removable side walls
- UHMW top
- Rotating top
- Stainless steel top
- Safety skirting
- Custom colors

MAX-PARTS TILTER

- Tilt Range: 0° - 40°
- Tilt Adjustment 1° per pump
- Dual Pump Levers for easy adjustment
- U.S. Patent number 4720232
- Manual Lowering control valve
- Chute locks
- Fork Pockets
- Units are stackable to save space

MAX-TILT HYDRAULIC TILT UPENDER

- Triple duty 15 min. internal motor
- Regreasable zerk fittings on pivot points
- Ribbed steel reinforced platform deck
- 115/230 single or 230/460 3 phase voltage
- 30 amp dedicated circuit is required for 115V
- 10' power cord (connector not included)
- Hydraulic gear pump
- Check & solenoid valve, filter & velocity fuse
- Color yellow top with blue frame
- Double acting cylinders
- Pressure compensated control valve
- Tilt limit switch
- Push button magnetic back control box
- Smooth steel decks
- High quality chrome plated cylinder
- Control box with magnetic starter transformer
- Thermal overload and fuses in control box
- Designed for surface or lift table mounting

ADDITIONAL OPTIONS:

- Foot control switch
- Tapered toe guards
- Lowering beeper
- Raised base
- Remote power unit
- Conveyor top
- Special color
- Adj. tilt limit switch
- Remote control
- Side walls
- Custom top mounts
- Custom lip
- Custom platform sizes
- Custom platform shapes
- Custom tilt speeds

Please contact us to discuss your requirements and we will be happy to design a solution tailored to your needs. **The table below only reflects general parameters.**

CUSTOM OPTIONS AVAILABLE

Zerk Fittings

On camroller and pivot points. Regreasable. Lasts longer than lifetime lubricated bearings. Easily serviced.

15 Min. Motor

Intermittent duty. Able to be run for 15 minutes of every hour. Suitable for medium and high cycle applications.

Ribbed Steel

Platform deck is reinforced by ribbed steel to eliminate load deflection and provide for stable load rotation throughout the stroke of the cylinder.

Platform Lip

Standard platform lip of 4" holds most containers in place during rotation. Custom lip lengths and shapes are available for higher load centers.

OPTIONS:

- Radio controlled lift
- Ball transfer top
- Removable side walls
- UHMW top
- Rotating top
- Stainless steel top
- Safety skirting
- Custom colors

MAX-LIFT AND TILT TABLE

- 1.5 HP intermittent duty TENV super torque motor
- 115V operating control voltage
- NEMA constant pressure. Magnet backed up-down push button control station with 10' straight or coiled cord
- All controller components meet UL and/or CSA specifications
- Cylinders with internal stops
- 10' power cord (connector not included)
- Integral safety restraint maintenance bars
- Tilt limit switch
- Powered up. Gravity down on 45° and powered down on 60° & 90° tilt
- S.A.E. hoses and fittings
- NEMA - 1 prewired controls and electrical connectors
- Control box contains contactor, control transformer, thermal overload and fuse
- Hard, chrome plated, polished shafting hydraulic cylinder piston rods
- Surfaces degreased, descaled and finished with Safety Yellow and Blue enamel
- Smooth steel top with yellow and black safety strips
- Internal gear pump with check valve, relief valve, solenoid valve
- Includes hydraulic oil and filter

ADDITIONAL OPTIONS:

- Foot Control Switch
- Up-Down Push Button with Key Lock-Out
- Adjustable Lift Limit Switch
- Adjustable Tilt Limit Switch
- Custom Platform Designs
- Hydraulic Fuse
- Remote Power Unit Pump, Motor & Tank
- Adjustable Flow Valve for Lowering
- Low Temperature Hydraulic Oil
- Lowering Beeper
- Tapered Toe Guards

Safe Lowering

Lowering of the chute is done safely with an adjustable flow control valve to ensure the chute does not slam.

Simple Controls

A handy, magnetic backed control box features simple up and down push buttons to control the unit.

Restraining Bar

A wide range of drum height can be dumped by moving a quickly changed restraining bar to the desired height.

Structural Ribs

AWS welded structural support reinforces the chute, providing rigidity and years of dependable service.

LPDD HYDRAULIC DRUM DUMPERS

- Handles containers up to 24" in diameter
- 1/60/110V Power unit
- Operation: Hydraulic up / Gravity down system
- Gravity down system with adjustable flow control to safely lower chute
- Heavy-gauge carbon steel construction with powder coat finish
- Magnetic backed control box to power chute up
- 45° maximum dumping angle
- Adjustable hold-down bar keeps container from shifting
- 1 HP motor and a 1 GPM pump
- 25 second up speed quickly dumps drums

ADDITIONAL OPTIONS:

- Custom Chute Sizes
- Custom Dump Heights
- Continuous Duty Cycle Motor
- Foot Controls
- Custom Hold Down Bar Heights

Separate Lift/Tilt

Tilting and lifting operations are independent of one another allowing for individual adjustments.

Ergonomic Handle

Comfortable handle with dimpled grip includes built-in pallet jack style lift, lower and neutral lever.

Selector Lever

Easily switch between the separate lifting and tilting valves by moving the lever to the desired function.

Rotation Lock

Handle locks into 3 different positions. Depressing the foot pedal releases the lock and allows repositioning.

MMTE ELECTRIC TILTER

- Independent lift and tilt functions
- Ergonomic handle

ADDITIONAL OPTIONS:

- Custom Chute Sizes
- Custom Dump Heights
- Tapered Chute
- Continuous Duty Cycle Motor
- Foot Controls
- Hand Controls
- Custom Hold Down Bar Heights

- Load Capacity: models range from 2,000 - 6,000 pounds
- Dump Height: models available in 36", 48", 60", and 72"*
- Operation: Hydraulic up / Gravity down system
- Rotary switch control activates chute
- Lockable on/off switch
- Structurally reinforced chute
- Adjustable hold down bar accommodates various container heights of 30" - 42" (on 2-inch centers)
- Heavy duty, all-welded steel construction with durable powder coat finish
- Dual flow control valves
- *72" dump height models in 4000-lb and 6000-lb capacities have chute elevated 12" off the floor. Fork lift required for loading.

MXSA WALKIE STACKER

- Adjustable forks
- Adjustable straddle legs
- Ergonomic handle
- 3 position control lever
- Hydraulic pump handle
- Hydraulic foot pump
- 4 bolt pattern steer casters
- Operator safety screen
- Push handles
- Entrapped rollers

MXIBH WALKIE STACKERS

- 12 volt electrical power
- Built-in battery pack and charger
- Interlocked channel and I beam mast
- Full filtration hydraulic system
- Dual lift chains
- Key lock
- Dual adjustable floor locks
- Certified to be OSHA compliant
- Premium steel frame construction
- Maneuverability in tight areas
- Shaft type forks
- Chrome plated lift cylinder
- Pressure compensation valves
- Continuously welded chassis
- No-drift check in neutral
- Built-In relief valve
- Screen mast guard
- One piece door cover

ADDITIONAL OPTIONS:

- Lowering Alarm
- Battery Discharge Meter
- Smart Charger
- Key Switch
- Remote Lift/Lower
- Ram
- Roller Bed Platform
- 36"-48" Wide Fork Carriage
- 3" Tall Load Wheel
- Phenolic Casters
- Poly Casters
- AC Pump Motor System
- ITA Class II Carriage
- ITA Class II Forks
- 36"-60" Long Forks
- 3" Wide Straddle Legs
- Straddle ID/OD Change
- Straddle Length Change
- "V" Groove Casters
- Die Puller

Entrapped Rollers

Rollers for the fork carriage are entrapped within a steel "C" channel providing secure placement of loads.

Ergonomic Handle

Comfortable handle with "lift", "lower" and "neutral" lever. Pumps up the fork carriage similar to a pallet jack.

Foot Pump

Forks can be raised by either the foot pump or by pumping the handle, allowing for the operator to decide.

Push Handles

Dual push handles, located at an ergonomic height, reduce the amount of effort required to transport the load.

Dual Chain

Heavy duty dual chain lifting system provides efficient and reliable actuation mounted on chrome plated lift cylinder.

Simple Controls

Centrally located lift/lower stick, amp meter, and key switch make operation of the stacker simple and intuitive.

Floor Lock

Ergonomically placed lever enables dual adjustable floor locks, creating a safe and secure positioning system.

Safety Screen

Heavy duty steel safety screen protects operators from accidental contact with lifting chains and cylinder.

OPTIONS:

Steel Wheel

Boom Hook

Load Platform

Drum Tilter

Adjustable Forks

Forks can go both over the outrigger or between the outrigger to handle a wide variety of open and closed bottoms.

Simple Controls

Conveniently located intuitive controls are easy to use. Includes lift/lower stick, keyswitch, BDI and charge lights.

Chain Pulley

Forks are raised by the cylinder which pushes up the mounted chain pulley. The chain then elevates the carriage.

Secure Top

Forks actuate smoothly on two vertical uprights secured by three points of contact per upright for easy positioning.

MMSE ELECTRIC MINI LIFT

- Lift / Lower Stick
- Key switch
- Battery discharge indicator
- Charging lights
- Emergency stop switch
- Built-in automatic charger and cord
- 12V deep cycle maintenance free battery
- (2) rear swivel casters with brakes
- (2) front rigid casters
- Chrome plated lift cylinder
- Cylinder overload protection
- Smooth steel top with backrest
- Chain pulley quietly lifts platform
- Push handle

OPTIONS:

Slide-On Platform

Variable Speed Lowering Control

Entrapped Rollers

Rollers for the fork carriage are entrapped within a steel "C" channel providing secure placement of loads.

Simple Controls

Centrally located lift/lower stick, amp meter, and key switch make operation of the stacker simple and intuitive.

Bolt Pattern

Our pattern of six bolts ensures structural stability of the adjustable straddle legs increasing overall safety.

Push Handles

Dual push handles, located at an ergonomic height, reduce the amount of effort required to transport the load.

MXEM WALKIE STACKERS

- Adjustable fork carriage
- Volt meter
- Key switch
- 120 Ah battery
- 12v 15 Amp amp charger
- Foot actuated floor lock
- Pallet forks
- Positive steer tracking caster
- Adjustable straddle legs

MXSE WALKIE STACKER

- 24volt Curtis transistor control
- Efficient 24V permanent magnet drive motor
- Adjustable straddles or fork over configuration
- Infinitely variable speed for tight turning
- Handle with safety reversing switch and horn
- Maintenance free AGM integral battery pack
- Built-in automatic 110VAC charger
- Battery discharge indicator
- Emergency power disconnect
- Key switch to limit access to approved personnel
- Lift cylinder is hard chrome
- Pump unit with DC motor, solenoid, & gear pump
- Electronic neutral braking
- Electromagnetic disc brake
- Offset steering arm
- Right angle stacking in aisles as narrow as 60"
- Travel, lift, and lower functions in handle
- Angle grips allow easy operation with either hand
- Low mounted arm for minimum steering effort
- All steel construction welded rigid steel chassis
- Fully enclosed wheel guard
- Flush mounted axles
- Removable one piece power head cover

MXSE22-96/116:

- Telescoping high visibility mast Inner rail
- Clear view Plexiglas mast guard
- Dual lifting chains
- Adjustable mast rollers

ADDITIONAL OPTIONS:

- Remote Control
- Slip-on Platform
- 40" Wide Carriage 36" Long Forks

Ergonomic Handle

With infinitely variable speed operation for tight turning in close quarters, safety reversing switch and horn.

Offset Tilter

Provides excellent line of sight for operators allowing for right angle stacking in aisles as narrow as 60".

AGM Batteries

Integral AGM batteries support opportunity charging & withstands vibration.

PM Drive System

24V DC permanent magnet drive reduces maintenance and overall operating cost.

HD ELECTRIC TUG**

- 24 volt electrical system
- Roller variable speed controls
- High/low switch controls top speed
- Horn & emergency stop button
- Foam filled 9" non-marking tires
- On-board automatic charger
- LED battery indicator gauge
- Transaxle Drive with gas shocks
- Three-position handle
- (4) 12v 35Ahr AGM sealed batteries
- (2) 3-1/2" non-marking casters
- Control handle and head pull down
- 8 hours of operation between charges
- Award winning ergonomic user controller
- Automatic sleep mode
- Regenerative dynamic braking

MAX-JACK MJ55 PALLET TRUCK

- Fork entry & exit rollers
- Beveled forks
- Forks reinforced with gussets
- 7"Ø dual nylon casters
- Adjustable push rods
- Hydraulic pump with overload valve
- Ergonomic handle
- Three position control lever
- Clearly decaled lever operation
- CE certified

Nylon Casters
Dual 7"Ø nylon casters minimize flat spots versus poly casters and offer reduced roll resistance.

Entry Rollers
Fork entry and exit rollers on the beveled end of the 48" long forks allow for easy pallet entry and exit.

Ergonomic Handle
Comfortable handle features control handle with clearly decaled "lift", "lower" and "neutral" positions.

Adjustable Rods
Adjustable push rods keep forks in alignment even after years of use. Simply tighten or loosen as needed.

MAX-JACK MJWPT45 PALLET TRUCK

- 3.25" lowered height
- Heavy gauge tapered forks
- Vertically mounted drive motor is directly mounted to gear housing
- 24V ZAPI travel controller
- Integral AGM batteries
- Quick disconnect power cut off
- Easily removable two piece power head cover
- Electromagnetic brake with neutral braking
- Poly load & drive wheels
- Thumb control travel function
- Lift & lower buttons
- Eight easily accessed grease zerks
- Battery discharge indicator
- Key switch
- Belly button reversing switch
- Horn

ADDITIONAL OPTIONS:

- 48" Load Backrest
- Cold Conditioning
- Rubber Lug Drive Tire
- Poly Traction Tire
- Fork Entry Rollers
- Stability Caster
- 8.1" Battery Compartment
- 33.5" Long Forks

Have You Wondered the Difference the Right Tool Makes?

ERGONOMIC EVALUATOR

Contact us for a free safety evaluation.
1-800-762-8327

Ballymore Safety Products is proud to provide ergonomic evaluation services thru our website. We use the TuMeke suite of ergonomic analysis tools to generate a MSD, Muscular Skeletal Disorder ranking from 1-10 using the REBA, Rapid Entire Body Assessment. The software also generates a NIOSH Lifting Index for the task that is being completed. When a video is provided, a Ballymore Safety Products Consultant will generate an analysis that includes REBA, NIOSH Lifting Index, and a video output with body links highlighted in Red, Yellow, Green indicating the risk level throughout the task.

Ballymore lifting / lowering solutions will be presented along with a predicted reduction in the back injury rate.

The predicted Back Injury Rate Reduction is based on a study performed by Marras from the Ohio State University Biodynamics Lab. The study involved 353 industrial jobs. The NIOSH lifting index was calculated for the 353 tasks and injury rates were tracked over a 6 year timeframe. A correlation between the NIOSH Lifting Index and injury rates was defined.

Submit a form and upload a video of the task that needs evaluating.

FREE EVALUATION!

With the addition of Certified Safety Professionals to our staff, we are happy to offer assistance with problem solving related to safety issues that are resulting in back injuries for our customers. We have the ability to help safety professionals quantify the difference an intervention will make in terms of the reduction in the rate of back injuries related to a specific task.

PAUL GILKINSON | CERTIFIED SAFETY PROFESSIONAL

Paul is a seasoned safety professional that has worked with a broad range of companies from Fortune 100 companies to locally owned family businesses over the last 30+ years. He has depth of experience in helping companies reduce the risk of severe injuries in the workplace. His past consulting work includes Retail, Manufacturing, Transportation, Construction, and Distribution Centers.

ZACK MOYA | CERTIFIED SAFETY PROFESSIONAL

Zack Moya is a new addition to Ballymore, who arrives with a storied history in Environmental Health & Safety. With over 12+ years, he has worked with a broad range of companies within the Fortune 100 across various industries including but not limited to: Warehousing, Transportation, Retail, Construction & Energy.

Product Specifications are subject to change without notice. Please confirm critical product specifications at the time of ordering.

Inspection Procedure

Shipments are made FOB factory. Each product has been inspected before shipment. Consignee is responsible to inspect product at time of delivery and should refuse shipment or provide written notice to carrier upon receipt of damaged products.

Carriers and Ballymore will not accept claims if damage is not noted at the time of delivery.

Freight: Ship Prepaid and Add to take advantage of freight cost reductions with our carrier. Service Charge will be added Ballymore can provide estimated freight cost based upon our preferred carriers. Note: Cost are subject to change depending on fuel surcharges, special delivery requirements, etc. Ballymore will not be responsible for differences in freight estimates and actual freight costs.

On collect or 3rd party billing shipments, any freight claims must be handled by the customer, including refused shipments.

WARRANTY (ALL PRODUCTS INCLUDING LIFTS):

- A. Seller warrants goods manufactured by it to be free from defects in material and workmanship for one (1) year following the date of shipment.
- B. Products, or component parts which may be sold by Seller but which are not manufactured by the Seller are not warranted by the Seller, but are sold only with the warranties, if any, of the manufacturers thereof
- C. Any warranty claim by the Buyer must be in writing, containing full details and submitted to Seller within 15 days of when the cause of the claim first came to the Buyer's attention. The relevant product must be held intact by the Buyer to be available for inspection by Seller's staff, agents or representatives.
- D. All product returns require a return authorization prior to shipping (RMA). Returns related to a warranty claim will be accepted on the condition that should Seller, in its reasonable opinion, reject the claim, all costs directly incurred by Seller (including the cost of transport to and from the premises of Seller and inspection) will be paid by the Buyer.
- E. The decision to repair or replace any parts of the product will be made by Seller based on which approach will provide the Buyer with the best service.
- F. The liability of Seller for a breach of any express warranty in these terms and conditions, or breach of an implied warranty, condition or representations required by law to be provided, if any, is limited to (the choice of which is at the discretion of Seller). In the case of product:
 - i. replace the product or provide similar product; or
 - ii. repair the product; or
 - iii. pay to the Buyer the reasonable cost of replacing the product or acquiring an equivalent product; or
 - iv. pay the Buyer the reasonable cost of having product repaired; or
 - v. accept return of the product and refund the purchase price;
- G. To the full extent permitted by law, Seller shall not be held liable for any defects in the product which are the result of:
 - a. improper use or mismanagement of the product by the Buyer;
 - b. operation other than in accordance with the Seller's operating manual or official user supplements and bulletins supplied by Seller;
 - c. use of the product in a manner which is not reasonably contemplated by Seller;
 - d. use of the product with parts which have not been approved for use by Seller;
 - e. modification of the product in a manner not authorized by Seller;
 - f. subjection of the product to unusual or non-recommended conditions, physical, environmental or electrical stress;
 - g. reinstallation or moving of the product by a person other than Seller or a 3rd party approved by Seller;
 - h. the Buyer's failure to comply with any of these terms and conditions; or
 - i. the failure or refusal to install engineering changes or enhancements to the product recommended by Seller.
- H. Notwithstanding any other provision of these terms and conditions, to the full extent permitted by law. Seller shall not be liable to the Buyer for any indirect, consequential, incidental, punitive or special loss (including, without limitation, loss of profits, business, interest or anticipated savings) howsoever arising and whether caused by the negligence of Seller, its employees, agents and/or contractors.
- I. This warranty does not cover labor or other costs or expenses to remove or install any defective, repaired or replaced goods.

Lift Products Manufacturing Core Warranty (For product manufactured by Lift Products Inc.)

- a. 2 year parts/ 5 year structural

RETURN POLICY:

If for any reason Buyer is not satisfied with any standard product received from Seller, Buyer must advise Seller within 15 days of receipt of your order. All items to be returned must be authorized and assigned an RMA number by Seller. We will not accept any returns without a Seller issued RMA number. All returns must be in good condition, in the original packaging (or reasonable substitute) and prepaid within a 15-day period of RMA issue. A 20% -25% re-stocking fee will be applied to all standard items including lifts; 50% on aluminum and stainless. All modified items are non-returnable.

NON-REFUNDABLE ITEMS:

Custom or modified ladders, work platforms, crossovers, modified or custom lifts are non-refundable.

MINIMUM ORDER: \$15.00. Prepay and add shipments are subject to a service charge.
